## **ST CATHERINES SUPPLIES** **SPRING NEWSLETTER 2018**

Dear Customer.

After all the rain we have had it will take a time for it to dry out enough to enable Spring cultivations and drilling to start.

We are able to offer a comprehensive supply of Fertiliser but supplies of Spring Cereal Seed get shorter by the day.

All other seed remains in good supply but Arable Silage Mixtures need ordering **NOW** Grass Seed Mixtures containing Late Heading Perennial Ryegrasses for Autumn sowing need ordering early as they are in short supply following difficult harvesting conditions last summer.

### **FERTILISER**

- *We have an excellent range of blended fertilizers* ●

**PROVING VERY POPULAR FOR HIGHER  
GRASS INTAKES AND HEALTHY STOCK IS  
SELENI SWEET GRASS 23/0/0 + 5SO3+8NAO + SE**

## **SCS HERBAGE SEED**

We have had **OUTSTANDING SALES** of **ST CATHERINES LEY MIXTURES** during 2017  
Prices have increased marginally owing to poor harvesting conditions in late summer 2017

**NEW** for 2018 is **TONIC PLANTAIN** a broad leaved perennial forage herb that is an ideal companion in mixed swards with Aber Red & White Clovers and Aber High Sugar Grasses

*Key Benefits of TONIC PLANTAINS:*

- **More Milk and Meat Production**
- **Increased Daily liveweight gain**
- **Higher weights at weaning**
- **High Dry matter production from early Spring until late Autumn**
- **Reduces the effects of internal parasites**
- **High Mineral content especially Copper & Selenium**
- **Very Palatable**

*TONIC is available in ABER HSG No. 1 and HSG No. 3  
and can be mixed with Timothy and PUNA 2 Chicory*

## **SPRING CEREAL SEED**

*At the time of writing we are able to offer*

**SPRING WHEAT** *Very Short Supply - we have:*

<b>BELEPI</b>	<b>KILBURN</b>
---------------	----------------

**SPRING BARLEY**

<b>PROPINO</b>	<b>CONCERTO</b>	<b>OVATION</b>	<b>LAUREATE</b>
<b>RGT IRINA</b>			

**SPRING OATS** *Very short supply*

<b>ASPEN</b>	<b>CANYON</b>	<b>WPB ELYANN</b>
--------------	---------------	-------------------

**SPRING BEANS**

<b>VERTIGO</b>	<b>LYNX</b>
----------------	-------------

## **Electricity Storage Solutions 2018**

**St. Catherines Supplies**

*in association with*

**Rob Wyborn**

I expect many of you have heard about the desperate situation the National Grid has got itself into. After countless years of neglect and 'head in the sand' management, the time has come to pay the Piper. The Piper in question is now landowners like you that have unused land close to electricity networks.

Last year the National Grid paid over £90m to operators of wind turbines to turn them OFF. Whilst they are producing free, renewable energy, the grid is not able to cope with the huge demand from both supply and demand. This has resulted in the urgent need to build a network of partners to invest in installing batteries to store and supply energy to and from the grid when it's needed.

Together with the Government's commitment to de-carbonised energy production - closing 75% of solid fuel power stations by 2030 - the National Grid are offering significant financial benefits for early adopters.

I can recommend that if you're interested in learning more how you can benefit from this then speak to Rob Wyborn on 01225 812578.

## **GOING DIGITAL!**

In an attempt to do our bit for the environment and to reduce costs, our newsletters and brochures can now be sent to you by email. If you would like to receive these in this manner, please go to our website at [www.stcatherinesseeds.co.uk](http://www.stcatherinesseeds.co.uk) where you can complete a simple form.
